

SIVA CHANDRAN S

AI Automation Developer

6383229911 | sivachandrangsenthil@gmail.com | Bengaluru, Karnataka | linkedin.com/in/sivachan03

CAREER SUMMARY

AI/LLM automation specialist with 1.5+ years building production systems using LangChain, n8n, and RAG architectures. Expert in optimizing workflows for LLM consumption, prompt engineering, and enterprise API integration. Proven track record delivering 5x accuracy improvements and 60-70% manual work reduction.

SKILLS

Languages: Python | JavaScript | Java | Dart | SQL

Frontend: HTML | CSS | Tailwind CSS | Bootstrap | Flutter | React

Backend: Django | REST API | LangChain | N8N

Databases: MySQL | PostgreSQL | SQLite3 | Firebase | ChromaDB

DevOps & Cloud: Docker | Azure Hosting (VM, OpenAI) | Render

Tools: Figma | Git | GitHub | API Integration | Web Services | Debugging | Azure

WORK EXPERIENCE

AI Automation Developer (Project-Based) | Gotoz Technology | Innovative Solutions | Dec 2024 – Apr 2026

- Built AI-powered workflow generation system using n8n + LLM integration for automated pipeline creation.
- Optimized large n8n JSON workflow data (~100K+ lines) by reducing it to relevant ~12K tokens, improving LLM performance and cost efficiency.
- Designed a custom node retrieval function to fetch only required workflow nodes dynamically instead of sending full data to the LLM.
- Implemented RAG-based approach using ChromaDB to store and retrieve relevant node configurations for accurate workflow generation.
- Improved LLM output accuracy by 5x through context filtering and semantic search-based node fetching.
- Integrated prompt-based workflow generation where users provide input and the system auto-generates complete n8n workflows.
- Enabled direct workflow saving into n8n via API, allowing instant execution and deployment.
- Implemented role-based authentication and credential management for secure workflow access and API usage.
- Developed features to view, manage, and edit generated workflows dynamically.
- Deployed the system using Docker and cloud platforms for scalable usage.

Full Stack Developer | AtoZerv | Sep 2023 – Oct 2024

Technologies: Python, Django, MySQL, HTML, CSS, Bootstrap

- Developed an end-to-end eCommerce platform allowing users to browse, order, and manage products.
- Implemented secure user authentication, product management, and dynamic order tracking.
- Integrated MySQL database for real-time order storage and admin dashboard management.
- Built REST APIs and authentication systems.

Technologies: Flutter, Dart, OpenWeatherMap API, REST API, JSON

- Built a real-time weather application fetching live data using RESTful APIs.
- Designed responsive UI components with Flutter widgets and Material Design principles.
- Created School Management and Bus Tracking system using Flutter and Django.
- Implemented real-time tracking and API-based data sync.

School Management & Bus Tracking System (Project-Based)

- Continued development on School Bus Tracking system, enhancing backend APIs for real-time data handling.

- Built live tracking map UI using Flutter with interactive map components for real-time bus location display.
- Integrated backend APIs with Flutter frontend for seamless real-time location sync.
- Optimized API response performance for live tracking accuracy and speed.

EDUCATION & CERTIFICATION

B.Sc. Computer Science | Government Arts and Science College, Bharathiar University | **Jul 2019 – Jul 2022**

Internship / Industrial Training | Geosoft | **Oct 2022 – Dec 2022**

PROFESSIONAL DEVELOPMENT

Python, C & Java (Core) Programming Certificate | CADD Centre, Tirupur | **Jan 2023 – Jul 2023**
